

hello
tomorrow

UNLOCKING THE POWER OF
DEEP TECH

We believe in the need for radical transformation in the way we eat, we move, power and run our industries.

This transformation can be supported by several waves of powerful technologies such as synthetic biology, AI and quantum computing, that we refer to as **deep tech**.

Scouting deep tech solutions worldwide

We power startup competitions worldwide to give innovation a platform. Partnering with 250+ universities & accelerators to unearth new innovations.

Innovation consulting & services

Help private and public organizations understand deep tech applications, regain agility and manage their own ecosystem.

DISCOVER

What we do

Building a collaborative ecosystem

Connect all key players (startups, universities, investors, accelerators and corporations) through global conferences, B2B events and online programs

Deep tech observatory

Identify and analyse innovation trends & dynamics leveraging experts and data from our network.

Generate debates to question the role of emerging technologies in our society.

HELLO TOMORROW GLOBAL CHALLENGE

The globally renowned
deep tech startup competition

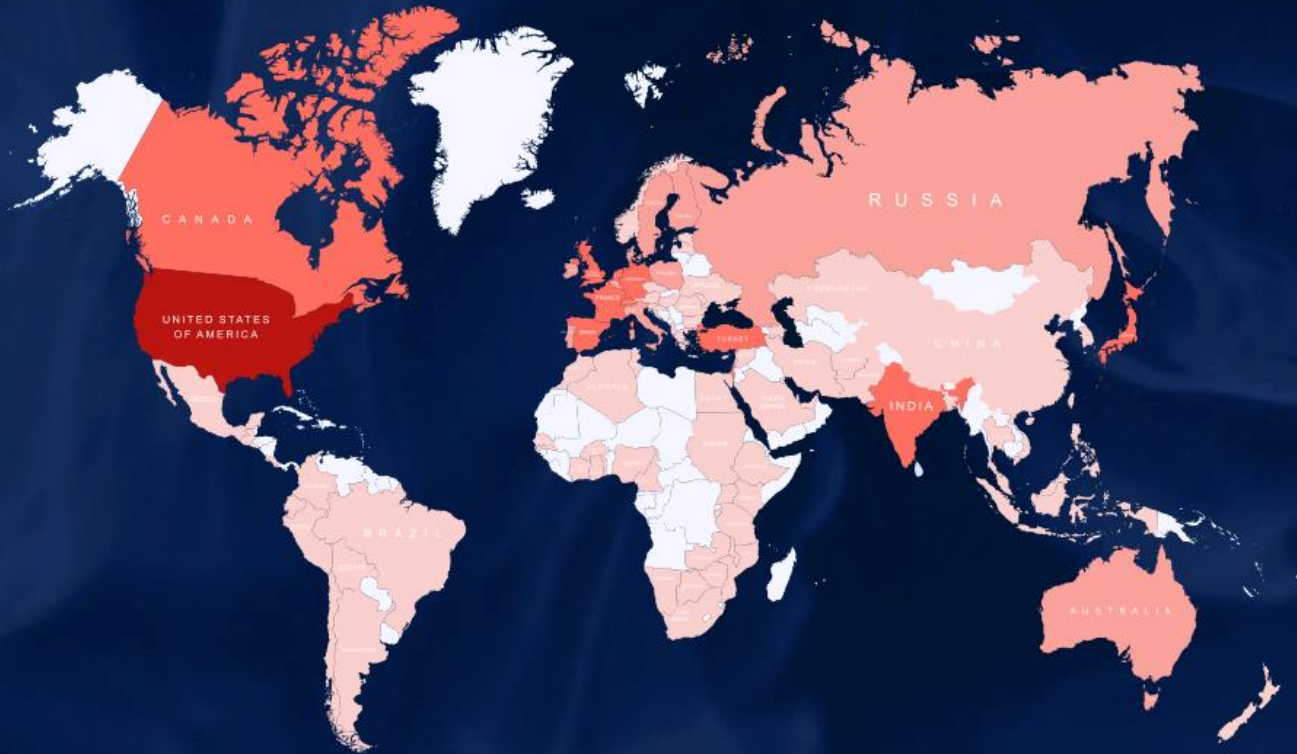

5,000 APPLICATIONS

128 COUNTRIES REPRESENTED

750 OF THE BEST STARTUPS SELECTED

14 WINNERS

6th EDITION 2019/20

TOP 6 UNIVERSITIES

EPFL

NUS
National University of Singapore

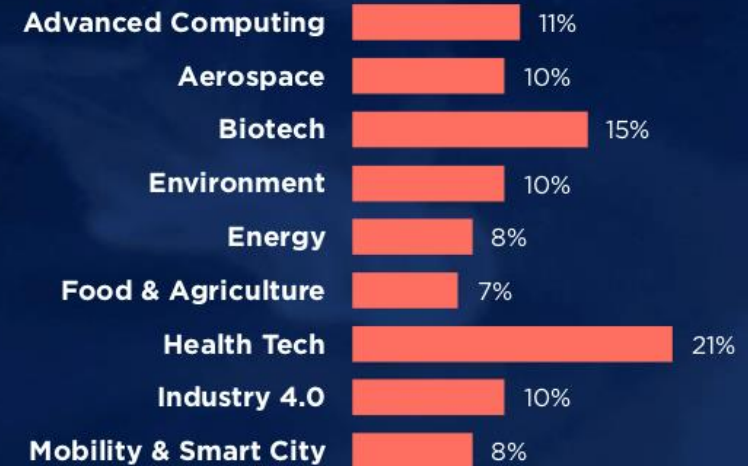

HARVARD UNIVERSITY

MIT

ETH zürich

TUM

TOP SECTORS

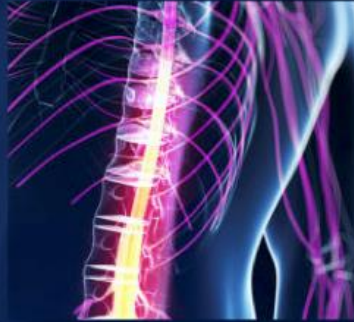

UNEARTHING TOMORROW'S GAME CHANGERS

Challenge alumni have raised more than \$350M

5

Hello Tomorrow
Grand Prize
Winners

GTX Medical

2014 - Switzerland

Developing implants for the spinal chord to enable paraplegic people to walk again.

Met their CEO at the Summit, who raised \$36M with them 2 years after the event.

Biocarbon Engineering

2015 - United Kingdom

Using drones to plant billions of trees for mass reforestation.

Met the CEO of Parrot at the Summit who became their strategic partner the same week.

Lilium Aviation

2016 - Germany

The world's first all-electric vertical take-off and landing jet.

Winning the Challenge gave them credibility - they raised \$100 million after the event.

Saathi

2017 - India

Producing biodegradable sanitary care from banana fibre aiming to help millions of women across the globe.

Gained global media exposure from attending the Summit and was named Forbes 30 under 30 2018.

RxAll

2019 - Nigeria/USA

Developing handheld nanoscanners assessing drug quality in real time to combat fake drugs.

30 articles published directly after their win (Fast Company, Le Monde, Deutsche Welle, etc.)

“If tomorrow is being built by the bright stars I met here at Hello Tomorrow, then I have great faith in our future.”

Jane Metcalfe

Co-Founder of WIRED
& Founder of NEO.LIFE

Building a collaborative ecosystem

Through global conferences,
B2B events and online programs.

NAVIGATE THROUGH DEEP TECH at the Global Summit

An interdisciplinary program

UNDERSTAND & QUESTION TOMORROW

The program focuses on 4 major themes: Space(s), Planet, Human, Machine

How can we hold climate change in check?

Which solutions to bring societies and outer space closer?

The ever-growing link between human and machine: how to design it?

Specialised masterclasses

LEARN FROM EXPERTS

Designed as the ultimate toolbox for startups, innovation management teams and investors.

From lab to first product: how to get there?

What every startup and corporate should know about exits

Smart investing: New ways to fund science

A unique networking experience

MEET THE RIGHT PEOPLE

Curated side sessions to meet & interact with some of 3,500 highly select participants from 60 countries

Informal “Unconference” side sessions

Attendee & Speaker debate sessions

Dedicated event networking tool
