GLOBAL SUMMIT

The best way to preview
the future is to create it

16 | 20

NOVEMBER 2020

ONLINE

The epicentre of deep tech goes online

The COVID-19 pandemic has, among other things this year, presented unprecedented challenges all over the world, and revealed more than ever the power of coming together to build solutions.

True to our roots at Hello Tomorrow, we are dedicated to finding new solutions to global problems and adapting to the world we live in as it shifts and evolves.

The best option to safely offer each member of our community the same unique experience that we always have, is for our Global Summit 2020 to be hosted fully online, from 16th to 20th November.

Keep reading to find out more about how our first ever virtual edition will look, and why we're so excited about it!

BE AMONG THOUSANDS OF SELECT, INTERNATIONAL PARTICIPANTS

“If Tomorrow is being built by the bright stars I met here at Hello Tomorrow, then I have great faith in our future.”

Jane Metcalfe, Founder of NEO.LIFE and Co-founder of WIRED

1000

INDUSTRY LEADERS

1000

DEEP TECH STARTUPS

300

INCUBATORS & ACCELERATORS

300

INVESTORS

150

INTERNATIONAL MEDIA

400

RESEARCHERS & UNIVERSITIES

PROPEL YOUR BUSINESS

Meet the right people

“Serendipity can actually be engineered - that’s what’s exciting about Hello Tomorrow.”

Ed Boyden, Professor at MIT

Connect with the right people on
our tailor-made event platform

Connect with other attendees

You’ll be able to connect and set up 1-to-1 meetings with every participant, exhibitor, partner and startup using advanced filters to find your perfect match! The platform will be open one week in advance, giving you time to create your own personalised profile and plan your schedule.

Participate in discussions

Take time out from the official program and join interactive sessions with fellow attendees and startups. You’ll also be able to test your knowledge on deep tech and compete with other actors in the ecosystem to win unique prizes!

Explore/showcase job opportunities

Our event platform will host a job board with the latest offers from our global network of attendees. On the job hunt? Have a browse! Does your company have an opening? Find your next team member!

INVESTOR DAYS

9th-13th November 2020

Invest in tomorrow's solutions

1-to-1 meetings with the best deep tech startups

300 startups

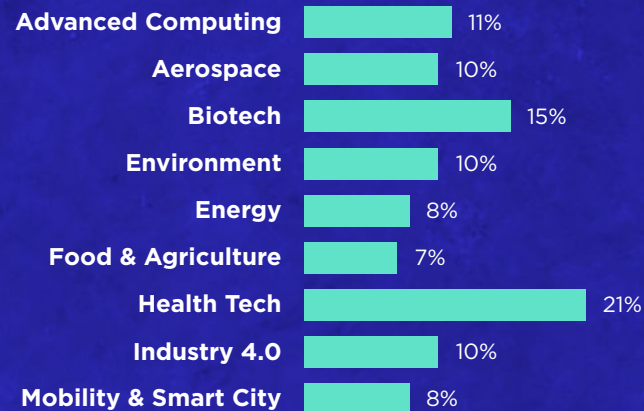

hand-picked from over

5,000+ applications

from

128 countries

STARTUPS BY SECTOR

The most prominent
VCs and CVCs in the world, including:

GET THE RIGHT MASTERCLASS TO SUCCEED

An interactive program where experts, corporates, investors and founders share their know-how to build up best practices

For Startups

Eg. From lab to first product. How to get there?

For Corporate Innovation

Eg. Innovation strategies: why do they often fail?

For Investors

Eg. Deep tech for impact: funding science for change.

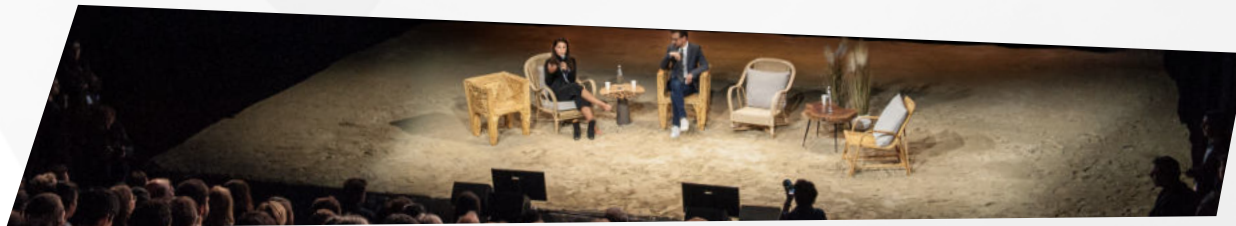

STAY AT THE CENTRE OF THE DEEP TECH ECOSYSTEM

even after the Global Summit

Enjoy 6 months free access to our new, exclusive content platform, where the very best of the global deep tech ecosystem will be showcasing, discovering and analysing the technology that's building our future in the form of keynotes, reports, roundtables discussions and more, all throughout the year.

GRASP THE FUTURE

An interdisciplinarity program exploring the potential of deep tech in a crisis

DAY 1 HUMANS

Curing diseases, fighting epidemics, extending life, without shying away from the ethical challenges; our societies are at a tipping point.

What will it mean to be human in 30 years?

#Healthcare #Wellbeing
#Biotech

DAY 2 MACHINES

Robotic dexterity is shaping the future of work. Powerful quantum computers force us to rethink our idea of security.

How can we design the ever-growing link between human and machine?

#Robotics #AI
#AdvancedComputing

DAY 3 SPACE(S)

From moving around in our ever-growing cities to colonizing our solar system, our spaces just got a whole lot bigger.

What are the solutions bringing closer, both societies and outer space?

#Mobility #Aerospace
#Aeronautics #SmartCities

DAY 4 PLANET

Inspired by Nature, fueled by research, new solutions are changing the rules. The deep tech revolution to save our planet is underway.

How radically must we change our behaviours to hold in check climate change?

#Food&Ag #NewEnergy #New materials #Environment

DAY 5 WHAT'S NEXT?

From the climate crisis to the ongoing pandemic, change is inevitable. Deep Tech is driving it by building long-term solutions to the unprecedented crises we are facing, as a society. Join the crowd and make your voice heard. Let's shape the future. Together.

#Ethics #Society #Future
